

JIE-YING ZHUANG

Electrical Engineer | System Design & Testing |

✉ c2201882@gmail.com

☎ +886 938 282 709

PROFESSIONAL SUMMARY

Electrical Engineer with 7+ years of experience in electrical system design, circuit schematic development, test planning, and hardware validation across consumer electronics and industrial applications. Proven ability to manage vendors, execute structured test programs, produce technical documentation in English, and troubleshoot complex electrical failures on-site. Experienced in overseas business trips across the U.S., China, India, and Mexico, and comfortable working in international environments. Holds Japanese JLPT N2 certification.

WORK EXPERIENCE

AetherTek Technology Inc. — Taipei, Taiwan

Senior R&D Electrical / Hardware Engineer

Apr. 2018 – Present

- ▶ Designed and developed electrical test system circuits for wearable devices, smartphones, and server platforms — including schematic capture and circuit verification analogous to vehicle electrical system design.
- ▶ Authored test plans, test procedures, and formal test reports in English; coordinated with U.S. and China teams to obtain customer approvals and manage technical reviews.
- ▶ Integrated and managed multiple test instruments (oscilloscopes, logic analyzers, power supplies, spectrum measurement tools) for hardware bring-up and validation programs.
- ▶ Developed Python automation scripts to orchestrate test equipment, log measurement data, and generate structured reports — reducing manual test effort by over 40%.
- ▶ Managed electrical equipment vendors and third-party suppliers across design, qualification testing, quality audits, and delivery milestones.
- ▶ Led team execution of client production programs, ensuring on-schedule delivery and compliance with customer quality requirements.
- ▶ Conducted overseas business trips to the U.S., China, India, and Mexico for on-site bring-up, troubleshooting, and customer technical support.
- ▶ Troubleshooted electrical failures at board and system level, produced root-cause analysis reports, and implemented corrective actions in collaboration with cross-functional teams.

Foxconn, iDPBG — Shenzhen, China

Electrical Engineer

Sep. 2017 – Apr. 2018

- ▶ Performed PCB failure analysis (FA) for mass-production mobile phone lines to improve manufacturing quality and production yield.
- ▶ Troubleshooted electrical failures at component and board level using oscilloscopes and logic analyzers.
- ▶ Assisted customers with experimental validation, circuit-level technical support, and preparation of defect investigation reports.

EDUCATION

Bachelor of Science in Electrical Engineering

National Chin-Yi University of Technology, Taichung, Taiwan | 2011 – 2015

TECHNICAL SKILLS

Circuit Design	DC/DC, Digital & Analog circuit design; Electrical schematic capture; Test circuit design
CAD / EDA Tools	OrCAD
Test Instruments	Oscilloscope, Logic Analyzer, Spectrum Analyzer, Power Supply, Data Acquisition Systems
Software	Python (automation, data logging, module development); Microsoft Word & Excel (technical documentation)
Protocols	I2C, SPI, UART, CAN Bus, Ethernet — hardware-level validation and signal analysis
Simulation	Circuit simulation tools (LTSpice / equivalent); signal integrity and power analysis

LANGUAGES

Mandarin Chinese	Native
Japanese	JLPT N2 — Intermediate to Advanced; Effective workplace and business communication
English	Professional Working Proficiency — technical documentation, customer communication & reports

KEY STRENGTHS FOR THIS ROLE

Circuit Design & Schematic Development 7+ years designing and validating electrical circuits across complex system environments	Test Planning & Execution End-to-end test program ownership: procedures, equipment, execution, and formal reporting
Vendor & Quality Management Experienced managing supplier design, testing, quality audits, and on-time delivery
